

SUSTAINABLE FORESTRY INITIATIVE® POLICY

September 2016

Fornebu Lumber Company Inc. is committed to the use of sustainable forestry practices that are scientifically credible and economically, environmentally, and socially responsible. Fornebu Lumber implement programs, training and procedures to adhere to the Sustainable Forestry Initiative® (SFI) standards and promotes the SFI principles which include;

- practicing sustainable forestry
- employing responsible practices
- regenerating the forest and maintaining productive capacity
- protecting long-term forest health and soil productivity
- protecting water resources, special sites and biological diversity
- managing the visual impacts of activities
- supporting forestry research and advancement

Fornebu Lumber Company Inc intends to broaden the practice of sustainable forestry through community involvement, socially responsible practices and through recognition and respect of Indigenous Peoples rights.

Fornebu Lumber Company Inc. will comply with all applicable federal, provincial, and local laws and requirements including applicable social, environmental and forest management legislation.

Fornebu Lumber Company Inc will also implement a procurement program that promotes among other forest landowners a land stewardship ethic based on the SFI principles.

Fornebu Lumber Company Inc. will monitor, measure and review its SFI policy, procedures and programs to continually improve it's performance in practicing sustainable forestry.
